

HVTS ECOSYSTEM FUND

An AI-powered autonomous wealth-generation infrastructure

The HVTS Ecosystem Fund is a vertically integrated, AI-driven trading infrastructure spanning cryptocurrency spot, perpetual futures, and global Forex — unified by a proprietary BiLSTM + Multi-Head Attention neural engine retrained autonomously every 12 hours. Investors access institutionally engineered alpha across three asset classes simultaneously: a Gate.io spot system running 7 concurrent autonomous strategies across 11+ pairs; a Quadruple-signal futures bot covering 90+ USDT perpetual pairs with up to 100x leverage; an MT5 Forex engine across 28 major and minor pairs with ATR-normalised sizing; a structured PAMM fund on Vantage LLC returning 50% monthly profits; and a 100-token Solana genesis portfolio backed by 100 live AMM liquidity engines operating 24/7 across 50+ global assets.

THE AI ENGINE — HVTS NEURALNETWORK

ASYMMETRIC SIGNAL PROTOCOLS

TRIPLE OR — SPOT PROTOCOL	QUADRUPLE AND — FUTURES & FOREX
ENTRY (Neural+Daily) OR (H4+Daily) OR (H1+Daily) bullish EMRG EXIT GMMA Daily bearish → close positions at minimal profit FORCE CLOSE ALL 4 signals bearish → close ALL positions + cancel orders NEUTRAL Signal present but no consensus → hold existing positions <i>Asymmetric: max entry opportunity · strict single-gate exit discipline</i>	ENTRY Neural AND GMMA 1D AND GMMA 4H AND GMMA 1H simultaneously bullish EXIT ANY single signal non-BULLISH → immediate market close all stages FX EXTRA Session filter (London/NY/Asia) + spread guard on news events STOP LOSS Position loss > ATR-based threshold → close regardless of signals <i>Maximum conviction entry · zero-tolerance leveraged exit discipline</i>

7 CONCURRENT AUTONOMOUS TRADING STRATEGIES
